

POST-REHA Network

The research project, "POST-REHA Network," aims to develop consistent and quality-assured rehabilitation services. Together with the Ruhr-Universität Bochum, the Service Network Duisburg GbR and the Free Ambulatory Nursing Care Association NRW e.V. (LfK), offers for the Duisburg area are exemplarily compiled, tested, and subsequently introduced into practice. Furthermore, this project strives to establish cooperation between authorities, rehabilitation providers and services.

On the one hand, the project addresses employees who suffer from stroke, spinal cord injury, amputation and heart disease. On the other hand, it deals with companies, which intend to integrate or reintegrate affected individuals and plan to implement a disability management system.

Methods: Action research, qualitative and quantitative research, expert interviews, document-analysis

Project Management Cologne: Prof. Dr. Dr. Mathilde Niehaus

Sponsor: Federal Government NRW, EU European Fund for Regional Development

Duration: 17.05.2010-16.05.2013

Research assistants: Dipl.-Psych. Gudrun Vater, M.Sc. Lene Friedrich-Gärtner, Lisa Feldhaus
